

LET US HELP DECORATE YOUR ORDER

Optimize any order with our comprehensive in-house decoration services

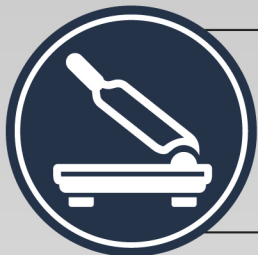

Screen Print

Screen printing is used to create incredibly high-quality designs with vibrant colors that stand out and maintain their clarity and brightness over time.

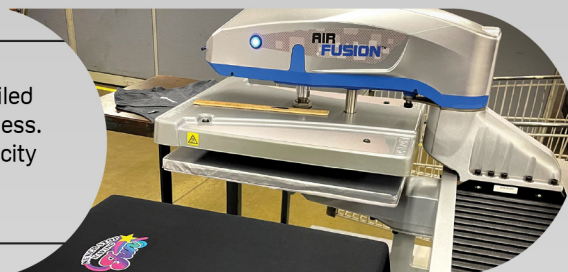

Embroidery

Embroidery provides a timeless, upscale look, perfect for both uniforms and fashion. Utilizing various stitches, this traditional method stitches designs directly onto the fabric.

Heat Transfer

Direct-to-film heat transfers deliver vivid, detailed imagery with a soft, matte finish and no tackiness. Lightweight yet durable, they provide high opacity and full-color CMYK printing.

Dye Sublimation

Dye sublimation printing produces vibrant, permanent colors that are embedded into the fabric rather than applied to the surface. As a result, images on the fabric won't fade or crack, even after multiple washes.

Private Label

Many of our garments can be converted to private labels using a one-color pad print decoration process. For multi-color designs, we can source heat transfer neck labels.
