

Syntrel™

Pure Polyester Knits Engineered For High Performance Activities

Syntrel™ leverages advanced UPF protection yarn and knitting technologies to maintain body temperature balance during performance activities. This exclusive Zorrel® fabric excels with its unique blend of specialized hydrophilic and hydrophobic filaments, which work together to wick moisture rapidly away from the body, keeping you dry and comfortable. Lightweight with a pleasing hand feel, Syntrel™ also offers inherent insulation properties, making it the ideal choice for those who demand both comfort and high performance in their activewear.
